ID	Date	Author	Subject	Type	Category	RUN Number	Beam	Ener
221	Tue Nov 29 19:40:47 2016	BRIKEN collaboration	New conf file	Configuration	DAQ BRIKEN			

BRIKEN DAQ parameters
Threshold of D4 clover, F11_PL

Old parameters for G7 clover were ok.

D4 clover was noisier, so threshold was increased from 20 to 25 for D4Black crystal, and from 20 to 30 for D4Blue crystal.

Threshold for F11_PL_L and F11_PL_R was decrease from 80 to 60, for both channels.

These changes were saved as a new configuration file: 161129_1926_Conf_BrikenFull.xlsx

Attachment 1: [161129_1926_Conf_BrikenFull.xlsx](#)

220	Tue Nov 29 19:08:39 2016	BRIKEN collaboration	Clovers	Problem Fixed	BRIKEN			
-----	--------------------------	----------------------	---------	---------------	--------	--	--	--

At 18:30 we could access to F11 and check the G7 Red. The problem was found. The HV cable was not connected to the HV source. It was not checked due to the short time to install it in the morning.

Now we checked the signal and it works propely.

219	Tue Nov 29 19:06:14 2016	BRIKEN collaboration	DAQ	Other	DAQ BRIKEN

==== COMMENTS =====

Before start this run the threshold on G7 Red was studied. We played with several values but finally decided to maintain the previous configuration because changing the threshold the shape of the spectra does not improve. The rate of G7 was too high. THE ONLINE LIVE TIME IS 65%!!
Robert checked the PA output and seems ok. When we can enter again we'll check the cabling.

10:35: Before start file, Timestamp reset. AIDA was running.

11:05 Synchronization checked Ok

11:36 Checking the rates after 1h run, as shown in the attached png the clover rates are higher due to the threshold on G7 Red.

12:00 Synchronization checked peak on 0 for BRIKEN and at 2.6ms for AIDA

14:20 Synchronization checked. Still peak on 0 for BRIKEN and at 2.6ms for AIDA (png attached)

14:25 Rates after 4h run (14:26) are also attached. We decided to increase the threshold on G7 Red when changing the run to not reset the times in between.

15:00 Around 14:50 there was a beam off recovered in few minutes.

16:39 Synchronization equal as before

17:27 Now the synchronization has peaks in 0 for both systems and also at 2.6ms (see also screenshot in a png file attached).

18:25 Stopped to fill Ge.

----- Rates -----

At 14:26 after 4 hours run.

RateBRIKEN = 141.645 cps

RateF11R = 239.82 cps

RateClovers = 16091.1 cps

RateVPLT = 10.6366 cps

RateVPLB = 3.23746 cps

RateAIDAPL = 24.9191 cps

At 16:39 after 6 hours run.

RateBRIKEN = 139.27 cps

```
RateF11R      = 235.787 cps
RateClovers   = 15971.5 cps
RateVPLT      = 10.4463 cps
RateVPLB      = 3.156 cps
RateAIDAPL    = 23.2078 cps
```

At the end of the run:

```

-----	--------------------------	----------------------	-----	--	--------------	-----	--	--

07:47 Run is started but there were problems with the Block. Therefore run was stopped 3 min later. File: 161128_0746_042.dlt

202	Mon Nov 28 06:34:56 2016	BRIKEN collaboration	DAQ Configuration file	Configuration	DAQ BRIKEN			
-----	--------------------------	----------------------	------------------------	---------------	--------------	--	--	--

From here changes in online rates!

A new configuration file has been created:
161128Conf_BrikenFull.xlsx

Changes in the Daq configuration are
- Integration limits for rates F11R, VPLT, VPLB, SiT, SiB.
- Thresholds for F11R and vetos VPLT, VPLB, SiT, SiB.

Configuration file is included!
